🔑 Rushikesh-9124

About Me

Computer Science undergraduate specializing in full-stack development with JavaScript and Next.js. My portfolio includes 10+ full-stack applications and a strong, demonstrated ability in coding and problem-solving, making me an interview-ready and independent contributor.

Education

Degree	Institution	Year	Marks/CGPA
B.Tech (CSE)	Bennett University	2022 – 2026	8.9/10
Class 12	Sri Chaitanya Jr. College	2021-2022	978/1000

Experience

Independent Developer & Problem Solver

Remote
Ongoing

Self-Driven Learning and Projects

- Solid foundation in DSA with 300+ problems solved on LeetCode, Codeforces, and GeeksForGeeks.
- Crafted reusable responsive UI components using React.js interfaces for 10+ full-stack apps using Tailwind CSS, improving mobile engagement by 40% through UI/UX enhancements.

Projects

Expense Tracker [GitHub](#) — [Live Demo](#)

- Constructed a secure Expense Tracker application using the MERN stack with JWT authentication, enabling users to track and categorize transactions with 99.9% data accuracy.
- Engineered intuitive dashboard displaying real-time expense breakdowns, empowering users to instantly identify top spending categories through interactive charts; improved user engagement by 60%.

STUD-AI AI-Powered Career Coach [GitHub](#)

- Engineered a comprehensive, AI-driven career platform using the Gemini API to instantly generate tailored resumes, cover letters, and dynamic mock interview questions, providing users with real-time performance feedback.
- Architected a secure, full-stack application utilizing a modern Next.js, Prisma, and PostgreSQL stack, with Clerk integrated for robust and seamless user authentication.

GenBlog — AI-Assisted Content Generation Platform [GitHub](#) — [Live Demo](#)

- Architected a full-stack blogging platform using Gemini API to generate SEO-optimized content from user prompts.
- Implemented JWT-based role access, Firebase Auth, and Cloudinary; built a responsive UI with TailwindCSS and deployed on Netlify and Render.

Music Player - Full-Stack Project [GitHub](#) — [Live Demo](#)

- Developed a responsive, feature-rich music streaming platform using MERN stack, and Cloudinary with RESTful APIs.
- Engineered RESTful APIs for a music streaming platform utilizing MERN stack, facilitating efficient data exchange and reducing API response times by 30% while streaming music.

Technologies

Languages: C++, Python, Java, JavaScript

Technologies: HTML, CSS, ReactJS, NextJS, TailwindCSS, NodeJS, ExpressJS, MongoDB, MySQL, PostgreSQL

Developer Tools: Git, VS Code, GitHub

Development Practices: Agile, Version Control, API Integration, Debugging

Certificates

- **The Bits and Bytes of Computer Networking** - Google ([Verify](#))
- **Algorithmic Toolbox** ([Verify](#))
